| Publication Details | Description about the book | The textile industry plays a very important role in the country's economy. The textile industry is one of the oldest, so that the technological and social development in this industry generally is well illustrated by the changes that took place in the manufacture of cotton and woollen goods. This book aims to provide some valuable information about textile fibres. A current broad account of the literature is presented scientific, yet simple way. It is intended to acquaint the reader with all important aspects of textile fibres, their chemical composition, fibrillar structure and morphological features. It will be highly informative to students, researchers, industrialists and general public. |
